Introduction

Fairsenden delivers your shipments to your customers: convenient, fair and ecologically friendly!

The app will integrate the Fairsenden carrier services into your Magento shop within seconds and free of charge. Once installed, your customers can choose Fairsenden as their preferred carrier. Moreover, after check-out, your customer can choose a 2 hrs. delivery time window and their preferred day for delivery.

The customer experience will boost your customer ratings, increase sales and reduce customer support efforts.

Be ready for Fairsenden's Parcel Delivery 4.0 service! Be ready for the future of carrier logistics!

The app will

- open your shop up to the carrier services of tomorrow
- connect your shop to Fairsenden's REST APIs
- provide you shipping and return label for your shipments
- give you a tracking link to the live status of your shipments
- integrate the delivery time picking calendar into the shopping process

Your customers will love it:

Thanks to the app, every customer has the chance to easily choose their individual delivery time within a 2 hrs time window. How? Quite simply. Fairsenden will present a calendar and time table, right after the check-out page, when choosing Fairsenden as shipping method.

Always keep the overview:

In addition, the app allows you to follow individual packages live via the tracking link.

Easy Handling:

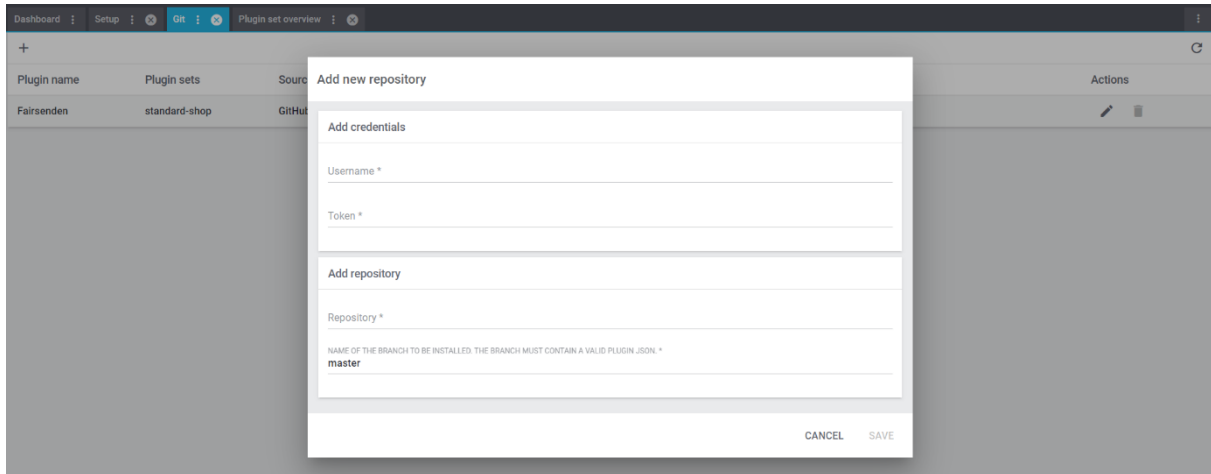

Create shipping and return labels with just two clicks in your administration area. The app connects your online store directly with the Fairsenden business customer portal.

Reduce costs:

The future of parcel delivery includes fully customer control over the time of arrival of their orders. This increases customer satisfaction and prevents costly returns and customer service interactions due to delivery problems.

1. Installation

- **Plugin → Pugin-Set-Overview → add Plugin → Git-Repository**

The screenshot shows a web application interface with a modal dialog titled "Add new repository". The dialog is divided into two sections: "Add credentials" and "Add repository".

Add credentials

- Username *
- Token *

Add repository

- Repository *
- NAME OF THE BRANCH TO BE INSTALLED. THE BRANCH MUST CONTAIN A VALID PLUGIN.JSON. *
- master

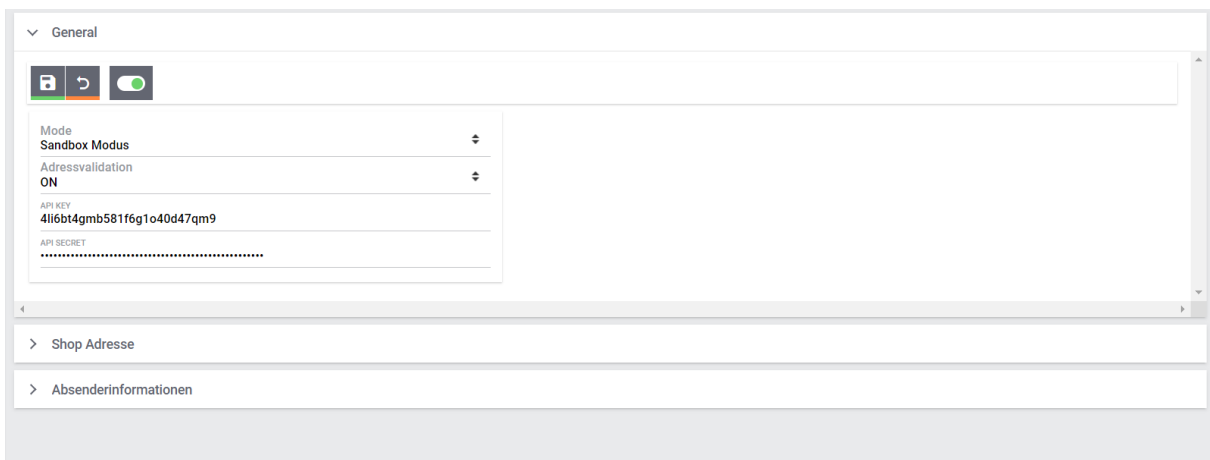

At the bottom right of the dialog, there are two buttons: "CANCEL" and "SAVE".

2. Configuration

2.1 Main configuration

To configure your Fairsenden Plugin, navigate to **Plugin → Pugin-Set-Overview → Fairisenden**

2.2 Field description

The screenshot shows a configuration window for the Fairsenden plugin. The 'General' tab is active, displaying several settings:

- Mode:** A dropdown menu set to 'Sandbox Modus'.
- Addressvalidation:** A dropdown menu set to 'ON'.
- API KEY:** A text field containing the value '41i6bt4gmb581f6g1o40d47qm9'.
- API SECRET:** A text field with a masked value represented by dots.

Below the main configuration area, there are two expandable sections: 'Shop Adresse' and 'Absenderinformationen'.

General:

If this field is enabled, Fairsenden will be activated in your shop.

Mode:

The Sandbox Modus lets you test the app without creating real shipments at Fairsenden.

Address Validation:

If this field is enabled, Fairsenden will validate the address fields in the checkout.

API-Key:

Defines the Client-ID for the Fairsenden API.

API-Secret:

Defines the Secret for the Fairsenden API.

Shop Address:

The shop information must be stored here

API-Secret:

The sender information must be stored here.

3. Customer Usage

The Fairsenden shipment will be displayed below if the customer fills in an address in which Fairsenden could Ship your products.

In our example we set the postal code to “13355” in Berlin.

Test User
 Lichtburgring 16
 13355 Berlin
 Deutschland
 test@user.de

Adresse ändern

Here your customer can choose between different delivery times. This option will be saved in your Fairsenden Dashboard.

Wann möchtest Du Deine Sendung entgegennehmen?

4. Prepare for shipping

To prepare your products for shipping, download the Label and Return Label PDF documents, you must navigate to

Setup → Orders → Fairsenden → Bestellungen / Orders

There you will find some actions, where you can print the desired labels and to track the shipment.

Fairsenden Übersicht

Troubleshooting

- Fairsenden is not loading on my stores shipping page
 - Check the config page if the “active” checkbox is checked?
 - Is the Zip code in one of the regions, Fairsenden ships to?
 - Plugin credentials correct?
